

## Leadership Academy

Please find a selection of our highly decorated leadership trainings. As we plan them individually and tailored to your needs, please feel free to contact us for dates and locations.

### Alpine Leadership Retreat 2026

Hear the silent music of your mind, when the noise of your all-day life disappears.

In a 4-day-**retreat** we rest behind the safe and welcoming walls of **Ettal Abbey** to find ourselves in **silence**, discuss **current trends** and **challenges** of leadership and management in focused groups, relax in its spa, on tracking tours or with bow and arrow.

### The People Organization

Build a positive organization based on values, resources and motivation. This will drive and enable a very special form of **employer branding** and implements most important principles of a **healthy, trustful and motivated organization**.

This 3-day training gives **hands-on tools** and is fully focused on methods you can directly use in your daily business.

### Positive Leadership

The main drive of psychology is the treatment of challenges and psychologic disorders. The field of **positive psychology** finds a constructive and scientific approach to **wellbeing and affirmative** way of handling your mind.

In a 3-day training we focus on **tools, concepts and leadership instruments** fully drawn to **positive leadership**, a **positive self-management** and how to **drive your organization** positively, relaxed and in a modern way.

Aside from our open trainings, we also offer inhouse-trainings for organizational development, leadership, project-/process-management, workplace- and leadership psychology.

## „Escape the Ordinary!“

Do you dare to escape the ordinary? We at letsmakithappen put people in projects, transformations, changes and even legal framework implementations first. We are legal and business professionals, but we also are trained psychologists and coaches. Because we think the holistic view is what helps a complex world!

## „Without Fear and Without Favor“

The famous judge's oath, we stand for clear communication, transparent handling of issues and also for a bold and brave approach in all the endeavours we take with you. Without Fear. And without Favor.

## The Bridge

In our logo and our slogan, we stand for connections! We build bridges between business goals, organizations, process and regulatory management and the human mind. We want to give identity, culture and motivation – but also be excellent in what we do!

## My work is hand signed

An artist signs her work, because it makes her proud – and it is only completed, once it is autographed. I see my work as that piece of art, that I can sign once it is perfect and complete! Only then, I can proudly hand it over to my client!

## Nice to meet you!

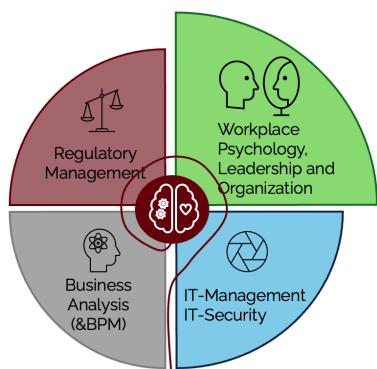

Hi, I am Dominic!  
I would call myself the joint between your business and your people!

With extensive experience in laws and psychology, I specialized in guiding complex projects and endeavours – always caring about goals and the people reaching for them!

This world is complex and I know that it needs an overarching mindset. That is why I explicitly concentrated on various trainings and formed a widespread skillset. Because there is no simple answer to complex questions, the world asks us!

There is one area, I would call home: Aviation!  
Ever since, I can remember, I found myself flying – powered and unpowered. However, life gave me a medical condition, being a threat to flying. But that only led to other fields of studies and brought me here ☺

**The world is complex! That is why complex + holistic skills are required!**

I see myself as the joint between business, regulatory management and people. Between legal, business, organizational requirements and the human mind.

*I am the legal professional, business expert and workplace psychologist with extensive digital knowledge. No matter, what you call me ☺*

## Workplace Psychology and Leadership/Organizational Development

As Workplace, Organization and Leadership Psychologist, I know that the most important and complex resource a company has, are the people.

From change projects, digital transformations, leadership trainings and coachings, up to performance management and management models, my focus has always been the joint between management and people!

And I know there is no excuse, when it comes to make our people feel seen and give them opportunity to evolve.

From projects, leadership, organizational transformations to personal, leadership and business coaching, I am always setting my priorities: the human involvement and enablement!

## Business Analysis / Process-/Project-Management

From digitization projects, digital transformations, implementations of internal, cooperate or legal frameworks (SOx, ERM, ISO), up to change projects, organizational changes (matrix organization, team implementations), my goal is to find and see the root of requirements and implement them with all hands on deck by motivating project teams and transparently explain the requirements to the senior management.

In the past, my customers appreciated the connection of business requirements, efficiency projects and people's development. I can proudly say: In all changes, I never lost one soul – although automation hit up to 85%!

## Regulatory Management

In political commissions, on the stages of Governments, in the risk committees of banks and private organizations – even in mediation of individual conflicts, all have one in common:

The need for structured analysis of legal requirements and the association with people. As legal professional and psychologist, I bring legal requirements and people efficiently together!

The result is motivation, rather than conflict. As I am a trained legal professional, I also do not fear the in-depth analysis of legal frameworks and the open debate about the sensible implementation.

## IT-Management and IT-Security

By implementing and transforming IT departments, and being their leader, trainer and coach, I acquired extensive experience and knowledge in the field of IT-Management and IT-Security.

I may not be a developer, but I can see and stimulate the big picture including automation and regulatory setup of running our systems!

## just imagine...

...all of this might be true!

I am the person that can connect organization-business- and legal requirements with your IT-setup and framework but does not forget your people. Even more: puts them first!

Imagine you might transform your organization without conflict and fear. Imagine you would efficiently implement legal frameworks without losing the time to concentrate on your business. And imagine, there would be a partner to challenge and exchange!

**Do you dare to escape the ordinary?**
